AVF 111, may be taken concurrently.

Course Learning Outcomes

Knowledge:

- Describe the fundamental elements of leadership relating to their role as pilots.

Application:

- Describe the effects technical knowledge, decision-making and ethics have on the safe operation of aircraft.

Integration:

- Incorporate effective leadership principles with real world scenarios.

Human Dimension:

- Recognize how their communication skills, technical knowledge and personal conduct affect the safety of flight.

Caring - Civic Learning:

- Describe why leadership is necessary in the aviation industry to enhance safety and efficiency.
- Reflect on how their actions impacts the non-flying community.

Learning How to Learn:

- Analyze the effectiveness of leadership attributes in dynamic situations common to pilots.
- Incorporate their own positive study habits as they prepare for recurrent training requirements of the FAA.
- Recognize the importance of self-study in keeping current in their profession.
