

HNR 241 - ADV MATERNAL CHILD NURSING-LEC

- Correlate community, state, and national resources available for the family with complex needs into the plan of care.
- Analyze data from a comprehensive assessment (physical, psychosocial, cultural, and spiritual) to distinguish characteristics that may be problematic for individuals or families in the future.

Course Description

This course provides information on complex problems facing families coping with complications during the childbearing/childrearing process, including an identification of at-risk families. These concepts will be applied to review of complications occurring during childhood and the prenatal, intrapartum and postpartum periods. Group 2 course.

Required Prerequisites

HNR 251 with a grade of 2.5 or higher and HNR 252 with an S.

Corequisites

HNR 221, HNR 242

Course Learning Outcomes

Knowledge:

- Incorporate best practices based on research into the nursing plan of care for the maternal-child and family health populations.

Application:

- Use clinical reasoning to ensure healthy practices persist when dealing with high-risk complications that can present during the preconception, prenatal, intrapartum, and postpartum periods.
- Formulate nursing interventions for at-risk indicators.
- Create a plan of care for the at-risk client and family during the prenatal, intrapartum, and postpartum periods.
- Apply the principles of health promotion/disease prevention, stress adaptation, growth and development, and cultural considerations for caring for families during the childbearing/child rearing periods.

Integration:

- Coordinate care with other disciplines for children with chronic, handicapping, and/or life-threatening illnesses.
- Coordinate care with other disciplines for families experiencing an at-risk prenatal, intrapartum, and postpartum periods.
- Evaluate at-risk indicators within multiple family structures.
- Incorporates safe care practices that minimize the potential for harm to patients, self, and health care team members.

Human Dimension:

- Plan nursing care with other disciplines for children with chronic, handicapping, and/or life-threatening illnesses.

Caring - Civic Learning:

- Apply grief theory into the nursing management of pregnancy and newborn loss.
