## Course Learning Outcomes

### Knowledge:

- Identify characteristics of a certified Remote Pilot per the FAA Airmen Certification Standards (ACS).
- Define terminology of airport operations including aircraft performance, regulations, meteorology, airspace and maintenance.
- Describe crew resource management roles and responsibilities.

### Application:

- Develop critical thinking and applied learning skills relative to the UAS field.
- Analyze air traffic patterns in a variety of settings.
- Hypothesize different outcomes to flight scenarios.

### Integration:

- Combine decision making competencies with remote piloting terminology in real life scenarios.

### Human Dimension:

- Critically reflect on the implications of unsafe UAS operations.
- Take responsibility for using technology that requires discipline and sound judgement.

### Civic Learning:

- Commit to civilian and airport personnel safety through regulatory compliance per the FAA Airmen Certification Standards (ACS).

### Learning How to Learn:

- Self assess positive study habits for recurrent training requirements of the FAA.
- Identify course concepts and other resources that will assist in the preparation for the FAA Remote Pilot written test.
